CONTROL FLOW GRAPH (CFG) — DDVS VERIFICATION WORKFLOW

McCabe Cyclomatic Complexity: V(G) = E - N + 2P = 17 - 14 + 2(1) = 5 | Predicates + 1 = 4 + 1 = 5

CFG Complexity Proof

- Total Nodes (N) = 14
- Total Edges (E) = 17
- Connected Components (P) = 1
- Decision Nodes (Pdec) = 4

Formula 1 (Graph Theory):

```
V(G) = E - N + 2P = 17 - 14 + 2 = 5
```

Formula 2 (Predicates):

```
V(G) = Pdec + 1 = 4 + 1 = 5
```
